Notes
R.6.1 - Change in Control - The statutory metric is 60 working days after receiving a 'complete' notification. We can "stop the clock" once during that period, for a maximum of 30 days, to request further information from the applicant. The days reported in the lower quartile, median and upper quartile are not working days, but the total number of calendar days between receipt of a notification, complete or not, and our determination. Where we receive an incomplete notification, the elapsed period between receipt and determination will include the period of time in which we are seeking, or waiting to receive, the missing information.
